Location: 5 nm east of the Complex Support Facility

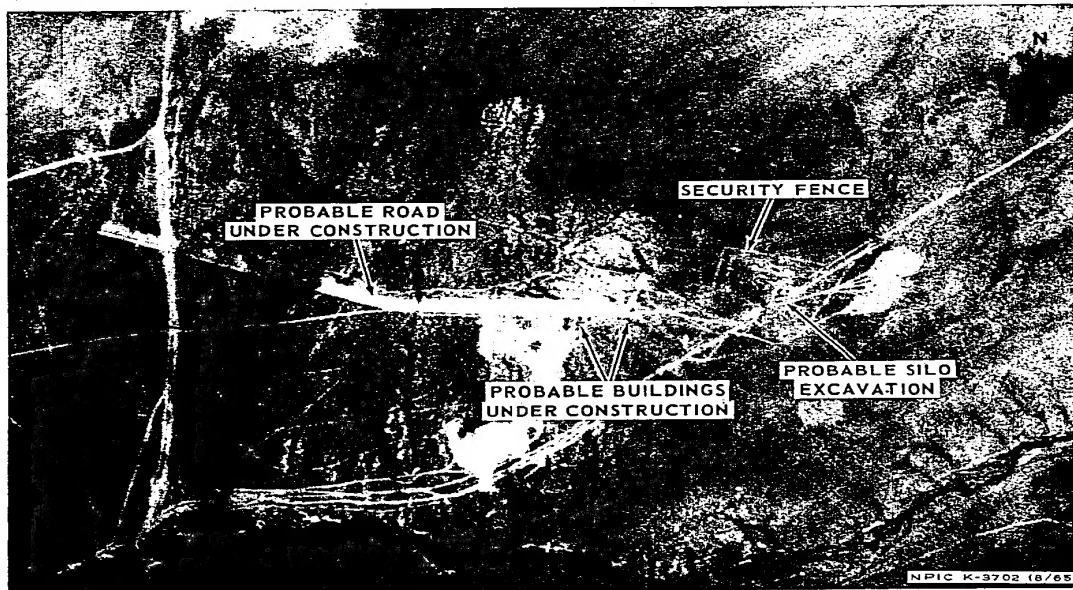

Type: IIIC

Negation Date: 

Stage of Construction: Early Date First Seen:

Construction activity consists of a secured probable silo excavation having 2 earthen access ramps. There are probably 3 buildings under construction west of the secured area. Earth grading, probably for a road under construction, leads from the probable buildings toward the Complex Support Facility. Interpretation is limited because stereo coverage is lacking, due to clouds.
